Wangaratta Cemetery
Landscape Master Plan
January 2019
In the Children's Section a box hedge is used to separate each plaque and give definition to the curved rows of burials. The curved rows provide opportunities for playful elements and seating.

The Memorial Walk could be similar to this illustrative image of Bunurong but with more relaxed plantings and organic curved pathways. Making use of the edges of the pathway for memorial plaques.
Headstone Lawn Section - Detail Plan
scale 1:200

The curved rows in the Lawn Section with gaps provide opportunities for memorial tree planting as well as amenity and shade value.

Vault Section with monuments

Concrete beams for Headstones.
