The project was constructed under the Rural City of Wangaratta’s North West Residential Growth Plan. The project creates a key link to the west side of Three Mile Creek that will allow for substantial residential development within Wangaratta.

As part of the project Council extended Cruse Street from the Wangaratta Turf Club entrance through to Reith Road. The works consisted of the construction of a bridge across the Three Mile Creek and 1.5 km of shared paths creating an urban environment for residents.
